DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-7 are rejected under 35 U.S.C. 102(b) as being anticipated by Wiener, Jr., U. S. Patent 3,981,091. Wiener teaches a picture frame comprising a transparent front panel, a back panel, and ^athe picture mounted there-between. Wiener also teaches an upper retaining element 13 having a main body 36, a pressure tab 38, and a clip notch 37 adapted to retain the front, back and picture together as seen in figure1. In addition, Wiener teaches a lower retaining member 14 having a base extension 46, vertical extension 44 adapted to retaining the lower end of the front, back, and picture together and adapted to provide a means to support the frame upon a horizontal surface. Both the retaining clips 13 and 14 having hook like member adapted to engage recesses or holes in the back panel.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 8-21 are rejected under 35 U.S.C. 103(a) as being unpatentable over Wiener, Jr. in view of Sturla, U. S. Patent 905,951. Sturla teaches a photograph holder comprising a double clip for rigidly or hingedly holding a pair of adjacent photograph cards. (See figures 1-6). It would have been obvious to one having ordinary skill in the art at the time this invention was made to construct the picture frame taught by Wiener with a double clip as taught by Sturla to provide a means to hold a plurality of adjacent picture frames.

4. Claims 8-10, 12, 14-21 are rejected under 35 U.S.C. 103(a) as being unpatentable over Wiener, Jr. in view of Kapstad, U. S. Patent 4,010,517. Kapstad teaches a sheet support apparatus comprising a double clip 60 for holding a pair of adjacent boards. It would have been obvious to one having ordinary skill in the art at the time this invention was made to construct the picture frame taught by Wiener with a double clip as taught by Kapstad to provide a means to hold a plurality of adjacent picture frames.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The following U. S. Patents are cited to show clip for holding display/picture frames: Lezni et al. 2,885,166 and Atkinson et al. – 1,313,778.
